

3D bioprinting,  
bioreactors  
and orthotopic transplants  
becomes the reality of  
modern science.

3D bioprinting,  
bioreactors and orthotopic  
transplants the fantasy of science  
fiction becomes the  
reality of modern science.

Organ engineering is a  
theoretical alternative to  
transplantation. Whole organs  
could be  
derived from patient's cells and  
transplanted similar to donor  
organs.
